Get involved: Local government

5. Facilities and resources

* Required fields

Deployment of a community-wide FTTH network will require Google to work closely with local government entities and other organizations. Google seeks to identify resources owned by the community that may assist in the rapid, smooth deployment of a residential fiber optic network. In this section, we ask you to share information about particular facilities and assets within the community that may be used or affected as part of such a facilities deployment, particularly those owned by the local government.

Please respond as completely and accurately as possible.

Pole attachments:

Please identify the entities, including units of the local government, that own or control utility poles in your community:

by telecommunications carriers (\$): by cable system operators (\$): by Internet access providers (\$): Entity name: Number of poles owned or controlled: Annual rate per pole for pole attachment: by telecommunications carriers (\$): by cable system operators (\$): by Internet access providers (\$): Entity name: Number of poles owned or controlled: Annual rate per pole for pole attachment: by telecommunications carriers (\$): by cable system operators (\$): by cable system operators (\$): by laternet access providers (\$): by cable system operators (\$): by telecommunications carriers (\$): by telecommunications carriers (\$): by laternet access providers (\$): by cable system operators	Entity name:
